OM SINGH JADON

Java / Spring Boot / Backend Development
Gwalior, India | omjadon242@gmail.com
Portfolio | GitHub | LinkedIn | LeetCode

PROFESSIONAL SUMMARY

B.Tech student in Computer Science and Business Systems (2028), building Java REST APIs, React interfaces and AI-assisted workflows. Shipped OnceTold and co-built ReturnTrail and SpiderSense, with hands-on debugging, database persistence and deployment experience.

TECHNICAL SKILLS

Languages: Java, SQL, Python, JavaScript
Backend: Spring Boot, Spring Security, JWT, REST APIs, JPA/Hibernate, FastAPI
Frontend and data: React, Next.js, HTML/CSS, PostgreSQL, MySQL, H2
Tools and foundations: Git/GitHub, Maven, Docker, Render, Neon, DSA, OOP

EXPERIENCE

Java Development Internship - Cognifyz Technologies | Jun-Jul 2026

Remote, task-based Java assignments | Work repository

- Completed Level 1 and Level 2 through six Java console applications, including a grade calculator, password utilities and Tic-Tac-Toe.
- Applied input validation, strings, arrays, methods and game logic; documented the work with Git and GitHub.

SELECTED PROJECTS

ReturnTrail - Evidence and Graph Context | Team build | Oct 2026

Java, Spring Boot, React, FalkorDB | With Ajeet Gadekar | Source | Demo

- Co-developed a source-linked workflow connecting disputed pickup records, statements and documents in FalkorDB.
- Used backend-enforced agent tool calls and retained reviewed sources so follow-ups can distinguish earlier explanations from new evidence.

OnceTold - AI Support Ticketing with Memory | Solo build | 2026

Spring Boot, React, FastAPI, Cognee, Groq, PostgreSQL | Source | Demo

- Built JWT-authenticated tickets and customer-scoped memory recall; agent resolutions feed later conversations.
- Migrated the demo from Railway/H2 to Render and Neon PostgreSQL; fixed recall timeouts, schema compatibility and authenticated memory access.

SpiderSense - Competitor Intelligence | Team build | Aug 2026

Next.js, Spring Boot, PostgreSQL, Bright Data, AI analysis | With Yogesh Sanodiya | Source | Demo

- Contributed across the frontend and backend to API integration, stored snapshots, deterministic change detection and AI-assisted explanations.
- Integrated the Bright Data acquisition workflow; kept simulated presentation scenarios distinct from real scraping.

EDUCATION AND CONTINUING EDUCATION

B.Tech, Computer Science and Business Systems - MITS Gwalior | 2024-2028

Minor Program in CSE and Advanced Technologies - CCE, IIT Mandi
Continuing education: programming, data structures and algorithms, systems and databases. Program credential issued Feb 2026.

ADDITIONAL

Problem solving: 150+ LeetCode problems; 50 Days Badge 2026 (profile checked 19 Oct 2026).
Student club: Event posters and social creatives for FUNTECH Club, MITS Gwalior, using Canva.
